PHOTOGRAPHIC REQUIREMENTS

Thank you for reading this important instruction regarding the taking of accurate **digital** photographs.

For any assessment of a plastic surgery application, I require comprehensive photographs taken of the areas in question.

Please follow the instructions below.

GENERAL:

All photographs should be taken in good light with preferably a dark background

Facial surgery:

I require photographs taken from the front and both left and right sides. The face should occupy approximately three quarters of the photograph.

Eye surgery :

Full facial photographs as per the instructions above must be taken.

A close up of the eye taken from the left and right sides and the front should be taken as well.

This close up of the eye should occupy at least 50 % of the photograph.

This will enable me to see the detail of the eye.

Nose Surgery (Rhinoplasty):

The limits of the photograph should be the top of the head above and include the chin below.

Frontal views and side views are required.

Other important views are to be taken from below, showing the nostrils, and above to show the bridge of the nose clearly.

Abdominoplasty (tummy tuck):

Photographs must be taken from the nipple level above to the pubic hairline below.

Frontal views as well as side views are required.

Please include clear photographs of any abdominal scars.

Liposuction:

The liposuction areas must be taken from the front as well as both sides.

If possible please mark the areas with a pen.

This will assist me in determining the correct areas in question.

Please include clear photographs of any scars within the liposuction areas.

Breast Surgery :

The limits of the photographs should be the chin above, and the umbilicus (belly button) below.

Frontal views as well as side views are necessary.

Any breasts scars should be well photographed.

THESE PHOTGRPAHS SHOULD BE EMAILED TO :

DRLJ@PLASTICSURGERYSA.CO.ZA

**PLEASE ENSURE THAT THE FILES EMAILED ARE SMALL FILES.
LARGE FILES ARE DIFFICULT TO DOWNLOAD.**

**THANK YOU FOR YOUR PATIENCE, UNDERSTANDING THAT THESE
PHOTOGRAPHS MAKE THE ASSESSMENT CLEAR , CONCISE & SIMPLE.**

**ONCE RECEIVED, AN APPROXIMATE QUOTATION WILL BE EMAILED TO
YOU.**

THANKING YOU

DR. LIONEL JEDEIKIN
